Steve Moddemeyer
Principal, Sustainable Development
CollinsWoerman

Steve Moddemeyer leads the global sustainable development practice for CollinsWoerman, an integrated architecture and planning firm based in Seattle. Steve leads the Cities of the Future program, an innovative policy initiative to radically increase the resilience and livability of cities through smart choices in land use and infrastructure investments. Steve speaks internationally including recent presentations in Stockholm, Singapore, Mexico City, Boston, Vienna, Istanbul, New Orleans, and Beijing, China. Working with the International Water Association, Steve helped launch a 3-year collaboration with the Turkish government and the cities of Istanbul, Kayseri and Trabzon. Prior to joining CollinsWoerman, Steve was a senior strategic advisor in the Director’s Office of Seattle Public Utilities.

Steve Robischon
PBAC Executive Director PBAC
IWRRI University of Idaho

Steve is the Executive Manager of the Palouse Basin Aquifer Committee (PBAC) and serves as an Assistant Director of the Idaho Water Resources Institute. He has degrees in Mechanical Engineering (BS, MS Montana State) and Geography (MS, University of Idaho).

Allyson Beall,
UI Waters of the West

Dr. Beall’s expertise includes the use of system dynamics as an environmental problem solving methodology. Her work supports the use of collaboratively built simulation models to improve environmental decision making processes and has included projects concerned with endangered species management, watershed and aquifer management.

Paul J. Kimmell
Avista Corporation
